

Getting Disability Benefits With Back Injuries And Diseases

Back diseases and injuries can create excruciating pain that can severely limit mobility, flexibility and one's ability to work. Given the fact that the spine is the core of the entire musculoskeletal system, any issue there will have a substantial impact on movement in general. Even simply sitting and performing sedentary tasks may be a challenge if pain from a back injury or disease is chronic.

Common Back Injuries And Diseases

Some common back injuries and diseases that can impair your ability to live and work include:

- Herniated nucleus pulposus
- Spinal arachnoiditis
- Spinal stenosis
- Osteoarthritis
- Degenerative disk disease
- Facet arthritis
- Vertebral fracture
- Nerve root compression

Securing disability benefits from the Social Security Administration (SSA) requires very specific medical evidence that a disease or injury is preventing you from working for at least 12 months. We can help you gather and present the necessary evidence in a compelling manner that can help you secure the benefits you deserve.

More Than 50 Years Of Experience Dedicated Solely To Helping Disabled Individuals Secure The Benefits They Deserve
